Arnaud ANDRE

Senior SharePoint, SPFx & Microsoft 365 Developer

Based in France | Primarily remote | Employment | Building for the web since 2019

arnaud.a.dev@gmail.com | arnaud-a.dev | LinkedIn | GitHub

I build intranets, business portals and custom interfaces in the Microsoft ecosystem. As a technical lead on complex projects, I connect business needs with useful, maintainable solutions that are easy to use.

AREAS OF EXPERTISE

Microsoft 365 & SharePoint - Intranets and custom WebParts that extend the standard SharePoint experience.

Business data & processes - Connecting data and automating HR and collaboration workflows.

Azure & implementation - Cloud development, deployment support and handover to internal teams.

SharePoint / SPFx / React / TypeScript / Microsoft Graph / REST APIs / PnPjs / Power Automate / Azure / Azure DevOps / Scaleway

PROFESSIONAL EXPERIENCE

PwC | Since August 2024

Application Development Consultant - Consulting · Internal teams and external clients

- Developing SharePoint and intranet solutions with SPFx, React, Power Automate and Azure DevOps.
- Building custom components and improving an existing Alteryx-based business process.
- Advising on technical choices, delivery strategy, documentation and best practices.

WebexpR | 2019 - July 2024

Lead Developer · Full-Stack Developer - Projects for BNP Paribas

- Leading front-end and full-stack development for SharePoint applications using SPFx, React and TypeScript.
- Building custom intranets, business portals and HR tools with a focus on user needs.
- Integrating lists and libraries through REST APIs; maintenance, support and handover to internal teams.

SELECTED PROJECTS

HR committee case management

React design and development, technical supervision of two developers, code reviews and deployment through Azure DevOps. SharePoint active storage and Azure cold storage.

Microsoft 365 intranets

Custom SharePoint interfaces for internal communication and collaboration, with reusable components and a tailored user experience.
