Arnaud ANDRE

Software Engineer - React & TypeScript

Based in France | Primarily remote | Employment | Building for the web since 2019

arnaud.a.dev@gmail.com | arnaud-a.dev | LinkedIn | GitHub

A developer since 2019, I design and build business applications with React, TypeScript and Microsoft 365. My experience includes code reviews, technical supervision and supporting users through launch.

AREAS OF EXPERTISE

Modern interfaces - Reusable components and accessible interfaces designed around users.

APIs & full-stack projects - External service integration and Python / FastAPI back ends in personal projects.

Cloud & delivery - Web application deployment, troubleshooting and technical collaboration.

React / TypeScript / JavaScript / HTML / CSS / SCSS / Python / FastAPI / REST APIs / Azure / Azure DevOps / Scaleway

PROFESSIONAL EXPERIENCE

PwC | Since August 2024

Application Development Consultant - Consulting · Enterprise applications

- Translating business needs into maintainable technical solutions and user-oriented interfaces.
- Developing React / SPFx and Power Automate solutions, including improvements to an Alteryx-based business process.
- Advising teams and clients on technical choices, implementation and documentation.

WebexpR | 2019 - July 2024

Lead Developer · Full-Stack Developer - Projects for BNP Paribas

- Leading web application development with React, TypeScript and JavaScript in Microsoft 365 environments.
- Designing interfaces for intranets, business portals and HR tools; REST API integration and data modelling.
- Collaborating with business teams, maintaining applications and supporting deployments.

SELECTED PROJECTS

HR committee case management

React design and development, technical supervision of two developers, code reviews and deployment through Azure DevOps. SharePoint active storage and Azure cold storage.

TRPG application

A personal application combining a React / TypeScript interface with a Python / FastAPI back-end, including API integration and deployment work.

Web portfolio

A bilingual presentation of my experience and skills, built with React / TypeScript and deployed with Azure Static Web Apps.
